( ) Automatic figures.

A guide on fuel economy and CO<sub>2</sub> emissions which contains data for all new passenger car models is available at any point of sale free of charge. In addition to the fuel efficiency of a car, driving behaviour as well as other non-technical factors play a role in determining a car's fuel consumption and CO<sub>2</sub> emissions. CO<sub>2</sub> is the main greenhouse gas responsible for global warming.

\* Fuel consumption figures shown are mpg/ltr per 100 km for the Urban, Extra-urban and Combined fuel cycles in accordance with EU Directive 99/94.

† Please note the production for these models will begin in early December 2009 and therefore will be subject to a longer lead time for delivery. The CO<sub>2</sub> figure for these models is estimated and has yet to be confirmed. Consequently, a change to this figure may result in a change to the Manufacturer's Recommended 'On the road' Retail price. Please consult your Volkswagen retailer for full details.

# Vehicle Excise Duty (VED).

On the 1st May 2009, there was a change to the VED (Vehicle Excise Duty) tax bands. Cars are taxed according to their CO<sub>2</sub> emissions, in bands A to M.

All vehicles first registered on, or after, 23rd March 2006 are subject to a new form of Vehicle Excise Duty (Road Fund Licence). This new duty is based upon the type of fuel the vehicle uses and its carbon dioxide (CO<sub>2</sub>) emissions level, measured in grams per kilometre (g/km). To help you identify the duty you will pay, the DVLA has created thirteen categories for petrol engines and thirteen categories for diesel engines.

Increased weight of a vehicle, including higher trim levels and the addition of options will have a detrimental influence on the level of fuel consumption and CO<sub>2</sub> emissions produced.

The CO<sub>2</sub> and fuel consumption figures are obtained from tests on a representative vehicle of the type, conducted and approved in accordance with Council Directive 80/1268/EEC as amended by Directive 1999/100/EC (or later) on the approximation of the laws of the member states relating to the carbon dioxide emissions and the fuel consumption of motor vehicles.

The chart below shows the VED bands and the charges which are levied:

## The Volkswagen Warranty

### Three-year Warranty

All Volkswagen passenger cars come with a three-year/60,000 miles warranty, which protects your car against the failure of most mechanical and electrical components due to manufacturing defects. This comprises a two-year manufacturer's warranty with unlimited mileage plus a further one-year/60,000 miles (whichever is soonest) Retailer Warranty. Should the mileage exceed 60,000 miles within the first two years, the manufacturer's two-year warranty will still be valid. If an additional warranty for subsequent years or higher mileage is desired, it may be purchased from an authorised Volkswagen retailer or repairer; however, this additional warranty must be purchased before the mileage reaches 60,000\*. Full details of the three-year warranty are available from your authorised Volkswagen retailer or repairer.

\*All warranty work must be completed by an authorised Volkswagen retailer or repairer.

### Body Protection Warranty

The internal body sections and panels of the Golf Estate are covered against rusting through from the inside for 12 years. Naturally, the vehicle must be cared for in compliance with the operating instructions. Please consult your authorised Volkswagen retailer or repairer for full warranty details.

### Three-year Paintwork Warranty

This latest warranty, pioneered by Volkswagen, really provides you with the widest possible cover on a new car.

There are no special conditions attached and paintwork manufacturing defects will be rectified without charge. Naturally, during the warranty period the car must be cared for in compliance with the operating instructions.

### Service Intervals

Volkswagen are pleased to offer you a choice on how your Golf Estate is serviced. The appropriate selection is entirely dependent on how the car is likely to be driven and its general use. To help you identify which type of service would be most suitable, please refer to the following guide.

The Time and Distance Service is recommended for vehicles that will cover less than 10,000 miles in 12 months and if the vehicle is likely to be used in the following way:

- Predominantly urban driving, short journeys with frequent cold starts.
- Activities regularly producing high engine loading, e.g. frequent hill climbs, driving with vehicle fully loaded and towing.
- Uneconomical driving style using high rpms with heavy acceleration and heavy braking.

The service intervals for the Time and Distance Service are as follows:

- Oil change service                      Every 10,000 miles/1 year (whichever is soonest).
- Interval service                          Every 20,000 miles/2 years (whichever is soonest).
- Inspection service                      Every 40,000 miles/3 years (whichever is soonest).

The LongLife Service is recommended for vehicles with a daily mileage of more than 25 miles where the vehicle is driven regularly mainly on longer distance journeys. The vehicle is driven mainly at a constant speed with minimum vehicle and engine loading, minimal towing and driven in an economical manner.

With the LongLife Service the vehicle can cover anywhere between 10,000<sup>†</sup> and a maximum of 18,000<sup>†</sup> miles or 24 months (whichever is soonest) between oil changes. Inspection service is typically in the third year of ownership and thereafter every second year, for vehicles with an approximate annual mileage of 10,000 miles.

<sup>†</sup> Please note that mileages are approximate as the service indicator system uses kilometres as the distance measurement. Please consult your authorised Volkswagen retailer or repairer for advice and full details.
